Invacare[®] Flo-tech[®] Contour Visco

Conforms to the shape of the body

The *Invacare[®] Flo-tech[®] Contour Visco* cushion is moulded from visco-elastic (memory) foam, which is temperature-sensitive to the body. As the foam warms, the contoured surface area conforms to body shape, improving posture, increasing comfort and maximising the surface area in contact with the client, thereby optimising pressure reduction. The *Flo-tech[®] Contour Visco* is suitable for those considered at 'High Risk' (Waterlow score - 20)* of developing pressure ulcers.

3 year warranty

➤ Deep moulded visco elastic (memory) foam cushion

The temperature-sensitive foam conforms to the client's body, maximising the contact area, delivering exceptional levels of comfort and optimising pressure reduction. The deep foam makes this cushion particularly suitable for heavier and taller clients.

➤ Contoured seating surface with pommel and side support

Offers increased lateral support and pelvic stability to enhance posture.

Options and Features

Water Resistant Cover

Cover is two-way stretch, water-resistant and vapour-permeable. Cover features an anti-slip base and carry handle.

Available in a wide range of sizes

The *Invacare® Flo-tech® Contour Visco* is available in sizes: 14 x 13" to 20 x 18" (36 x 33 to 51 x 46 cm).

Manufactured to European Standards:
Foam: BS 5852: 1982 Crib 5
Cover: BS 7175: 1989 Crib 5

* Essential nursing care is pivotal in pressure ulcer prevention. These cushions will positively contribute to the outcome of a pressure ulcer prevention care plan. Education, clinical judgement and action based planning based on vulnerability are fundamental factors in the prevention of pressure ulcers. The Waterlow score is a formal method of assessing risk from pressure ulcer development, and should be used in conjunction with an informal assessment (informed nursing judgement). Informal assessment is considered to be of greater importance and clinical value.
